

ENVIRONMENTAL MANAGEMENT POLICY

POLICY

Inter Pipeline complies with all applicable laws, regulations and operating permits. Inter Pipeline operates its business in a manner that protects the environment, promotes environmental stewardship, and supports long-term sustainability throughout the asset life cycle. We recognize that strong environmental performance is essential to the success of our overall business, and we commit to continual improvement of our operations.

SCOPE

This policy is applicable to all Inter Pipeline employees, contingent workers, and contractors at all sites where Inter Pipeline operates.

COMMITMENTS

Inter Pipeline:

- Strives to minimize the environmental impact of our operations and improve the efficient use of resources over time.
- Establishes and implements policies, standards, programs, and procedures to ensure work practices comply with all applicable environmental legislation, sustainability commitments, operating permits and are specific to its asset operations.
- Incorporates energy efficiency and carbon reduction measures to prevent and minimize the environmental impacts of its operations.
- Sets and reviews environmental objectives, and continually monitors and assesses environmental performance as part of assurance and improvement programs.
- Implements effective and timely response measures to manage environmental incidents and reduce potential impacts to the environment, human health and safety, and property.
- Develops and fosters a culture that encourages respect for the environment, emphasizes everyone's responsibility in environmental performance, and fosters appropriate operating practices through employee awareness, training, and stakeholder engagement.
- Communicates regularly about, and makes this policy available to, all workers, communities, governments, and stakeholders.
