

OUR COMPANY

We are one of Canada’s leading energy infrastructure businesses. Inter Pipeline is a world-scale energy infrastructure business engaged in the transportation, processing, marketing and storage of commodities and petrochemical products across Western Canada and Europe.

Our operations are broken down into four divisions:

- » Transportation
- » Petrochemicals
- » Facilities Infrastructure
- » Marketing

OUR STANDARDS

Our work is guided by the core values of Honesty and Integrity, Teamwork, Entrepreneurial Spirit and Pursuit of Excellence. These values are critical to our on-going success. Employees at every level of the organization apply these values to their daily work.

OUR OPPORTUNITIES

OUR COMMITMENT TO HEALTH, SAFETY AND ENVIRONMENT

- The health and safety of our employees, communities and the protection of the environment is a priority for Inter Pipeline.
- Actions speak louder than words, and our commitment is as much about what we’re doing today and tomorrow as it is about what we’ve done to date. Those efforts include:
- » Preventative environmental health and safety (EH&S) programs that proactively identify potential hazards
 - » Employee and contractor engagement directly factors into the design of our EH&S improvement programs
 - » Collaboration with regulators, industry peers, communities, rights holders and other stakeholders help us build standard-setting programs
 - » Founding partner in Plastics Research in Action, a 10-year partnership with the Northern Alberta Institute of Technology researching opportunities to end plastic waste
 - » We are also a member of the Global Alliance to End Plastic Waste, and a supporter of the Alberta Institute for Wildlife Conservation

CEP had 0 lost time incidents in 2024.

OUR COCHRANE EXTRACTION PLANT

The Cochrane Extraction Plant (CEP) plays a crucial role in Canada’s energy infrastructure, safely and efficiently processing natural gas to produce valuable energy products that fuel the daily lives of millions of people across Canada and beyond.

CEP is one of the largest of its kind in Canada, with the capacity to process 2.5 billion cubic feet of natural gas per day. This allows us to recover approximately 100,000 barrels per day of natural gas liquids (NGL), including:

65,000 barrels per day of ethane used to manufacture the essentials of daily living

35,000 barrels per day of propane-plus, energy source for heating homes and fueling businesses and industry

As a key processing site on the western leg of the TC Energy Alberta System, the CEP supports local and national energy needs, ensuring responsible and sustainable energy development.

History: CEP has been a part of the Cochrane community since 1968. It takes about 60 employees to operate it 24 hours a day, 7 days a week.

Product: Gas processed at the plant is sales specification product from the TC Energy mainlines that is used to fuel our homes and industry. After Cochrane extracts the ethane and propane this gas makes its way down the Pacific Northwest to California.

Capacity: CEP can process enough natural gas in one day to supply 25,000 homes for a year.

Maintenance: CEP has one full-plant maintenance shutdown scheduled every five years. During these turnarounds there can be an increase in noise and local traffic. The next turnaround is expected to be in 2027.

Environment: White, cloudy vapors can sometimes be seen on top of CEP’s cooling towers. These towers help remove heat from the water-cooling systems, and the cloud coming off them is water condensation only with no environmental impact.

All CEP emissions are monitored continuously and reported regularly in line with regulatory requirements. The plant operates well below Ambient Air Quality Objectives limits and any other applicable regulatory limits.

OUR COMMITMENT TO EMERGENCY MANAGEMENT

Effective emergency management starts with risk mitigation. Inter Pipeline invests heavily in training and preparedness with the goal of zero incidents.

CEP has a comprehensive emergency response plan (ERP) detailing roles and responsibilities, critical response procedures, public protection measures and emergency communication protocols. The plant conducts a broad range of emergency response drills and exercises every year to ensure we are always ready and prepared.

In the unlikely event of an emergency, early detection and response is vital. Our state-of the-art control centres and leak detection systems allow us to continuously monitor, remotely control and operate our systems, so that we can address any problems or anomalies in real-time.

OUR ACKNOWLEDGEMENT

We acknowledge that our assets are located on the traditional and ancestral territories of the Indigenous Peoples who have lived on these lands and taken care of them since time immemorial.

We are on Treaty 6, 7 and 8 territory, as well as the historical regional homeland of the Métis. We acknowledge that our Cochrane Extraction Plant is situated on Treaty 7 territory, traditional lands of the Stoney Nakoda peoples. We acknowledge and respect the histories, languages and diverse cultures of the First Nations, Métis and Inuit and are grateful for their contributions that continue to enrich our communities.

OUR INDIGENOUS RELATIONS

Inter Pipeline is fully committed to advancing reconciliation through long-term meaningful, ethical and mutually beneficial relationships with Indigenous communities.

We base our commitments on four pillars:

- » Consultation
- » Business opportunities
- » Community
- » People

60 Indigenous community events attended in 2024

90% of Inter Pipeliners have completed online Indigenous Awareness Training

\$40 million dollars spend with active Indigenous owned business suppliers

OUR COMMUNITY COMMITMENT

We believe in being a good neighbour by prioritizing safety, environmental responsibility and community engagement.

Our local community initiatives, landowner relations and donation activities help us connect with the communities where we live and operate. Our Inter Pipeline Cares (iCare) fund makes meaningful contributions to charitable organizations that support basic societal needs:

- » Food
- » Wellness for the vulnerable or under served in our Canadian operating areas
- » Shelter

Inter Pipeline made the following contributions across Alberta and Saskatchewan in 2024:

\$4.2 million dollars donated to local organizations

8,211 volunteer hours logged through our iCare Giving Platform

290+ organizations supported through the iCare Giving program

We have also contributed directly to the Cochrane area:

- » **\$675,000** to Alberta Air Ambulance services HERO, HALO and STARS
- » More than **\$700,000** over 10 years with the Alberta Wild Institute for Conservation
- » Each year, CEP employees pack **hundreds of school bags with supplies** for under-resourced students Mini Thni
- » **\$600,000** for baseball fields and interpretative walking trail development
- » **\$50,000** annually to events supporting food, shelter and other local causes

We are proud to be part of Cochrane and are committed to open communication and collaboration with our local community. If you have any questions about our operations or would like to learn more about our safety and environmental programs, we invite you to connect with us.
